

ALL ABOUT HOSTING

Infographic by The Wise Willow Blog

FREE HOSTING SITES

Pros

- Free service, easy to sign up
- Multiple options, easy website setup
- No commitment necessary
- Small learning curve, lots of advice

Cons

- Your site name will include the domain (ex. sitename.weebly.com)
- Your site footer will include the domain name
- You won't own rights to your content for monetizing since you don't own the server or potentially the domain name

SITES TO LOOK INTO

blogger.com
weebly.com
wordpress.com

SELF-HOSTING SERVICES

Pros

- You own your domain name and your site server (you will have sitename.com)
- Access to service provider resources and online chat help 24/7
- Backed up content data on large servers
- Access to Wordpress.org and all of its services (plugins, etc.)

Cons

- Monthly fee and renewal fee for domain name ownership
- Longer commitment means lower rates, so minimum of one year is recommended
- More of a learning curve for Wordpress.org, longer site set-up time (but you learn great skills!)

SITES TO LOOK INTO

hostgator.com
fatcow.com
siteground.com (my favorite)
